EDUCATION

2022 - 2026

SRM University (CGPA - 9.45)

- B.tech Computer Science and Engineering

2021

DAV School Gopalapuram

- SSLC (12th) - 88%
- SSLC (10th) - 89%

SKILLS

- Project Management
- Problem Solving
- Teamwork
- Finance Management
- Effective Communication
- Critical Thinking

LANGUAGES

- English (Fluent)
- Tamil (Fluent)
- French (Basics)

PROFILE

As a Computer Science and Engineering graduate from SRM University, I bring a strong foundation in technology and a passion for crafting innovative solutions. With expertise in NodeJS, React , Tailwind CSS, NOSQL Databases and Python for problem-solving and data analytics, I am equipped to tackle diverse challenges in web development and application design. My focus lies in creating user-centric experiences that seamlessly blend functionality with aesthetics. Whether it's building responsive websites or developing robust applications, I am dedicated to delivering impactful solutions that exceed expectations and drive meaningful outcomes.

CORE SKILLS

Web Development

Javascript • React • Firebase • Version Control • Express • MongoDB

- Adept in full stack development using React Javascript and version control usability (Git , Vercel).
- Experienced in Firebase Data Management and Storage with advanced authentication and Data analysis skills.
- Good at maintaining workflow and understanding data structures and algorithms

Problem - Solving

Python3 • Java • C Programming • Jupyter

- Proficient and skilled in solving dynamic problems with advanced algorithms.
- Understanding complex solutions and interpret critical problems
- Captivate better results and craft perfect solutions for problems using Deep Learning

Data Analytics and Visualization

Excel • SQL • Mathematics • GenAI • Machine Learning

- Experienced in Data analysis tools and visualization techniques
- Good at extracting information and analyze using advanced Machine Learning Algorithms
- Skilled in Data prediction and utilization

PROFILE - PROJECTS

- Logistics and Supply Chain Management MERN Project
- Bio Heritage Eco-friendly Web3 Platform Project
- Business Connect Web Application using React
- Parking Slot Booking React Native Application
